### **REASONS FOR ALLOWANCE**

The following is an examiner's statement of reasons for allowance:

Independent claims 1, 21 and 22 (renumbered to 1, 19, and 20) teach the limitations of systems and mediums "at least one application context in which an application is executed, the application context including an application CGI for managing the application, and a communication interface on which application data is communicated as messages;

a messaging bus configured to communicate the messages for processing by the application;

at least one gateway context including a gateway CGI configured for maintaining two-way asynchronous communication between the messaging bus and a remote application, said remote application through a firewall, said remote application being executed by a client, the gateway CGI being configured to maintain the two-way asynchronous communication until termination of the remote application or by the gateway CGI; and

a web server, said web server configured to establish one socket connection with said client through said firewall and configured to initialize the gateway CGI after receiving an HTTP request to initialize the gateway CGI from said remote application;

wherein the gateway CGI is configured to perform operations to enable said two-way asynchronous communication between said messaging bus and said remote application to occur within the single HTTP transaction and over said one socket connection" in a system for collaborative processing with distributed applications.

The prior art does not teach the cited limitation.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
